## **Item 4 Advisory Business**

### **Description of Firm**

3CM Capital Management, LLC is a registered investment adviser primarily based in North Canton, Ohio. We are organized as a limited liability company ("LLC") under the laws of the State of Ohio. We have been providing investment advisory services since March 2020. We are primarily owned by Delford P. McCallister II. Currently, we offer the following investment advisory services:

- Portfolio Management Services
- Financial Planning Services
- Financial Consulting Services
- Selection of Other Adviser Services

The following paragraphs describe our services and fees. Refer to the description of each investment advisory service listed below for information on how we tailor our advisory services to your individual needs. As used in this brochure, the words "we," "our," and "us" refer to 3CM Capital Management, LLC and the words "you," "your," and "client" refer to you as either a client or prospective client of our firm.

### **Portfolio Management Services**

We offer discretionary portfolio management services. Our investment advice is tailored to meet our clients' needs and investment objectives. If you retain our firm for portfolio management services, we will meet with you to determine your investment objectives, risk tolerance, and other relevant information at the beginning of our advisory relationship. We will use the information we gather to develop a strategy that enables our firm to give you focused investment advice and/or to make investments on your behalf.

If you participate in our discretionary portfolio management services, we require you to grant our firm discretionary authority to manage your account. Discretionary authorization will allow us to determine the specific securities, and the total amount of securities, to be purchased or sold for your account without your approval prior to each transaction. Discretionary authority is typically granted by the investment advisory agreement you sign with our firm and the appropriate trading authorization forms.

You may limit our discretionary authority (for example, limiting the types of securities that can be purchased or sold for your account) by providing our firm with your restrictions and guidelines in writing.

We may also offer non-discretionary portfolio management services. If you enter into non-discretionary arrangements with our firm, we must obtain your approval prior to executing any transactions on behalf of your account. You have an unrestricted right to decline to implement any advice provided by our firm on a non-discretionary basis.

We may offer complimentary financial planning services as part of our portfolio management services.

### **Financial Planning Services**

We offer financial planning services which typically involve providing a variety of advisory services to clients regarding the management of their financial resources based upon an analysis of their individual needs. These services can range from broad-based financial planning to consultative or single subject planning. If you retain our firm for financial planning services, we will meet with you to gather information about your financial circumstances and objectives. We may also use financial planning software to determine your current financial position and to define and quantify your long-term goals and objectives. Once we specify those long-term objectives (both financial and non-financial), we will develop shorter-term, targeted objectives. Once we review and analyze the information you provide to our firm and the data derived from our financial planning software, we will deliver a written plan to you, designed to help you achieve your stated financial goals and objectives.

### **On-Going Services**

As part of our financial planning services, we also offer continuous financial management and budgeting services of your financial plan. Clients will have access to continuous support.

Financial plans are based on your financial situation at the time we present the plan to you, and on the financial information you provide to us. You must promptly notify our firm if your financial situation, goals, objectives, or need change.

You are under no obligation to act on our financial planning recommendations. Should you choose to act on any of our recommendations, you are not obligated to implement the financial plan through any of our other investment advisory services. Moreover, you may act on our recommendations by placing securities transactions with any brokerage firm.

### **Financial Consulting Services**

We offer financial consulting services that primarily involve advising clients on specific financial-related topics. The topics we address may include, but are not limited to, risk assessment/management, investment planning, financial organization, or financial decision making/negotiation.

## **Selection of Other Advisers**

We may direct clients to third-party investment advisers. Before selecting other advisers for clients, we will verify that all recommended advisers are properly licensed, notice filed, or exempt in the states where we are recommending the adviser to clients.

## **Wrap Fee Programs**

We do not participate in any wrap fee program.

## **Types of Investments**

*We offer advice on certificates of deposit, commercial paper, equity securities, exchange traded funds (ETFs), futures contracts on intangibles, money market funds, municipal securities, real estate, real estate investment trust (REITs), United States government securities and variable annuities.*

*Additionally, we may advise you on various types of investments based on your stated goals and objectives. We may also provide advice on any type of investment held in your portfolio at the inception of our advisory relationship.*

*Since our investment strategies and advice are based on each client's specific financial situation, the investment advice we provide to you may be different or conflicting with the advice we give to other clients regarding the same security or investment.*

## **Written Acknowledgement of Fiduciary Status**

When we provide investment advice to you regarding your retirement plan account or individual retirement account, we are fiduciaries within the meaning of Title I of the Employee Retirement Income Security Act and/or the Internal Revenue Code, as applicable, which are laws governing retirement accounts. The way we make money creates some conflicts with your interests, so we operate under a special rule that requires us to act in your best interest and not put our interest ahead of yours. Under this special rule's provisions, we must:

- Meet a professional standard of care when making investment recommendations (give prudent advice).
- Never put our financial interests ahead of yours when making recommendations (give loyal advice).
- Avoid misleading statements about conflicts of interest, fees, and investments.
- Follow policies and procedures designed to ensure that we give advice that is in your best interest.
- Charge no more than is reasonable for our services; and
- Give you basic information about conflicts of interest.

## **Assets Under Management**

As of December 2022, 3CM Capital Management, LLC managed \$5,187,000.00 in discretionary assets under management.

## Item 5 Fees and Compensation

### Portfolio Management Services

Our fee for portfolio management services is based on a percentage of the assets in your account and is set forth in the following annual fee schedule:

#### Annual Fee Schedule

Assets Under Management	Annual Fee
\$0 - \$250,000	1.20%
\$250,000 - \$1,000,000	1.00%
\$1,000,000 - \$5,000,000	0.80%
Above \$5,000,000	0.60%

Our annual portfolio management fee is billed and payable, monthly in arrears, based on the balance at the end of the billing period. There is a minimum annual fee of \$180.00 per account billed and payable, monthly in arrears, at \$15.00 per month. Minimum fee may cause accounts under \$15,000.00 to have higher annual fee percentage.

If the portfolio management agreement is executed at any time other than the first day of a calendar month, our fees will apply on a pro rata basis, which means that the advisory fee is payable in proportion to the number of days in the month for which you are a client. Our advisory fee is negotiable, depending on individual client circumstances.

At our discretion, we may combine the account values of family members living in the same household to determine the applicable advisory fee. For example, we may combine account values for you and your minor children, joint accounts with your spouse, and other types of related accounts. Combining account values may increase the asset total, which may result in your paying a reduced advisory fee based on the available breakpoints in our fee schedule stated above.

We will deduct our fee directly from your account through the qualified custodian holding your funds and securities. We will deduct our advisory fee only when the following requirements are met:

- You provide our firm with written authorization permitting the fees to be paid directly from your account held by the qualified custodian.
- The qualified custodian agrees to send you a statement, at least quarterly, indicating all amounts disbursed from your account including the amount of the advisory fee paid directly to our firm.

We encourage you to reconcile our invoices with the statement(s) you receive from the qualified custodian. If you find any inconsistent information between our invoice and the statement(s) you receive from the qualified custodian, call our main office number located on the cover page of this brochure.

You may terminate the portfolio management agreement upon 15 days written notice. You will incur a pro rata charge for services rendered prior to the termination of the portfolio management agreement, which means you will incur advisory fees only in proportion to the number of days in the month for which you are a client. If you have pre-paid advisory fees that we have not yet earned, you will receive a prorated refund of those fees.

### **Financial Planning Services**

We charge a fixed fee for financial planning services, which generally ranges between \$500 to \$1500. The first half of the estimated fee is due in advance of services rendered with the remaining balance payable upon completion of the contracted services. The fee is negotiable depending upon the complexity and scope of the plan, your financial situation, and your objectives. We do not require you to pay fees six or more months in advance and in excess of \$500. Should the engagement last longer than six months between acceptance of financial planning agreement and delivery of the financial plan, any prepaid unearned fees will be promptly returned to you less a pro rata charge for bona fide financial planning services rendered to date.

### **On-Going Services**

Clients will be billed a monthly fee of \$99 for continuous financial management and budgeting services of your financial plan. The on-going fee is billed in advance on the first of each month or on the first business day of the month. This monthly fee is in addition to the fixed fee referenced above.

You may terminate the financial planning agreement upon 15 days' written notice to our firm. If you have pre-paid financial planning fees that we have not yet earned, you will receive a prorated refund of those fees. If financial planning fees are payable in arrears, you will be responsible for a prorated fee based on services performed prior to termination of the financial planning agreement.

### **Financial Consulting Services**

We charge an hourly fee of \$250 for financial consulting services. The hourly fee is negotiable depending on the scope and complexity of the services rendered. Our consulting fees are due at the inception of the consulting relationship.

You may terminate the financial consulting agreement upon 7 days' written notice to our firm. If you have pre-paid financial consulting fees that we have not yet earned, you will receive a prorated refund of those fees. If financial consulting fees are payable in arrears, you will be responsible for a prorated fee based on services performed prior to termination of the financial consulting agreement.

## **Selection of Other Advisers Fees**

We may direct clients to third-party investment advisers. We will receive its standard fee on top of the fee paid to the third-party adviser. The fees shared are negotiable and will not exceed any limit imposed by any regulatory agency. The notice of termination requirement and payment of fees for third-party investment advisers will depend on the specific third-party adviser selected.

We may specifically direct clients to Zacks Investment Management. The annual fee schedule is as follows:

<b>Total Assets</b>	<b>Firms' Fee</b>	<b>Third Party's Fee</b>	<b>Total Fee</b>
\$0 - \$250,000	1.20%	0.18%	1.38%
\$250,001 - \$1,000,000	1.00%	0.28%	1.28%
\$1,000,001 - \$5,000,000	0.80%	0.28%	1.08%
\$5,000,001 and Up	0.60%	0.28%	0.88%

The fees are withdrawn by the custodian and pays each party TPMM and your firm its portion of payment of fees. The fees are paid either monthly or quarterly and in advance or in arrears, as agreed upon by the client and the firm.

## **IRA Rollover Considerations**

As part of our investment advisory services to you, we may recommend that you withdraw the assets from your employer's retirement plan and roll the assets over to an individual retirement account ("IRA") that we will manage on your behalf. If you elect to roll the assets to an IRA that is subject to our management, we will charge you an asset-based fee as set forth in the agreement you executed with our firm. This practice presents a conflict of interest because persons' providing investment advice on our behalf have an incentive to recommend a rollover to you for the purpose of generating fee-based compensation rather than solely based on your needs. You are under no obligation, contractually or otherwise, to complete the rollover. Moreover, if you do complete the rollover, you are under no obligation to have the assets in an IRA managed by our firm.

Many employers permit former employees to keep their retirement assets in their company plan. Also, current employees can sometimes move assets out of their company plan before they retire or change jobs. In determining whether to complete the rollover to an IRA, and to the extent the following options are available, you should consider the costs and benefits of:

1. Leaving the funds in your employer's (former employer's) plan.
2. Moving the funds to a new employer's retirement plan.
3. Cashing out and taking a taxable distribution from the plan.

4. Rolling the funds into an IRA rollover account.

Each of these options has advantages and disadvantages and before making a change we encourage you to speak with your CPA and/or tax attorney.

If you are considering rolling over your retirement funds to an IRA for us to manage here are a few points to consider before you do so:

1. Determine whether the investment options in your employer's retirement plan address your needs or whether you might want to consider other types of investments.
2. Employer retirement plans generally have a more limited investment menu than IRAs.
3. Employer retirement plans may have unique investment options not available to the public such as employer securities, or previously closed funds.
4. Your current plan may have lower fees than our fees.
5. If you are interested in investing only in mutual funds, you should understand the cost.  
structure of the share classes available in your employer's retirement plan and how the costs of those share classes compare with those available in an IRA.
6. You should understand the various products and services you might take advantage of at an IRA provider and the potential costs of those products and services.
7. Our strategy may have higher risk than the option(s) provided to you in your plan.
8. Your current plan may also offer financial advice.
9. If you keep your assets titled in a 401k or retirement account, you could potentially delay your required minimum distribution beyond age 72.
10. Your 401k may offer more liability protection than a rollover IRA; each state may vary.
11. Generally, federal law protects assets in qualified plans from creditors. Since 2005, IRA assets have been generally protected from creditors in bankruptcies. However, there can be some exceptions to the general rules so you should consult with an attorney if you are concerned about protecting your retirement plan assets from creditors.
12. You may be able to take out a loan on your 401k, but not from an IRA.
13. IRA assets can be accessed any time; however, distributions are subject to ordinary income tax.
14. May also be subject to a 10% early distribution penalty unless they qualify for an exception such as disability, higher education expenses or the purchase of a home.
15. If you own company stock in your plan, you may be able to liquidate those shares at a lower capital gains tax rate.
16. Your plan may allow you to hire us as the manager and keep the assets titled in the plan name.

It is important that you understand the differences between these types of accounts and to decide whether a rollover is best for you. Prior to proceeding, if you have questions contact your investment adviser representative, or call our main number as listed on the cover page of this brochure.

### **Additional Fees and Expenses**

As part of our investment advisory services to you, we may invest, or recommend that you invest, in mutual funds and exchange traded funds. The fees that you pay to our firm for investment advisory services are separate and distinct from the fees and expenses charged by mutual funds or exchange traded funds (described in each fund's prospectus) to their shareholders. These fees will generally include a management fee and other fund expenses. You will also incur transaction charges and/or brokerage fees when purchasing or selling securities. These charges and fees are typically imposed by the broker-dealer or custodian through whom your account transactions are executed. We do not share in any portion of the brokerage fees/transaction charges imposed by the broker-dealer or custodian. To fully understand the total cost you will incur, you should review all the fees charged by mutual funds, exchange traded funds, our firm, and others. For information on our brokerage practices, refer to the Brokerage Practices section of this brochure.

### **Compensation for the Sale of Securities or Other Investment Products**

Delford P. McCallister II is licensed as an independent insurance agent. He will earn commission-based compensation for selling insurance products to you. Insurance commissions earned by Mr. McCallister II are separate and in addition to our advisory fees. This practice presents a conflict of interest because Mr. McCallister II has an incentive to recommend insurance products to you for the purpose of generating commissions rather than solely based on your needs. You are under no obligation, contractually or otherwise, to purchase insurance products through Mr. McCallister II.

## **Item 6 Performance-Based Fees and Side-By-Side Management**

We do not accept performance-based fees or participate in side-by-side management. Performance based fees are fees that are based on a share of capital gains or capital appreciation of a client's account. Side-by-side management refers to the practice of managing accounts that are charged performance-based fees while at the same time managing accounts that are not charged performance-based fees. Our fees are calculated as described in the Fees and Compensation section above and are not charged based on a share of capital gains upon, or capital appreciation of, the funds in your advisory account.

## **Item 7 Types of Clients**

We offer investment advisory services to individuals, high net worth individuals and corporations or other businesses.

In general, we do not require a minimum dollar amount to open and maintain an advisory account; however, we have the right to terminate your Account if it falls below a minimum size which, in our sole opinion, is too small to manage effectively.

We may also combine account values for you and your minor children, joint accounts with your spouse, and other types of related accounts to meet the stated minimum.

## **Item 8 Methods of Analysis, Investment Strategies and Risk of Loss**

### **Our Methods of Analysis and Investment Strategies**

We may use one or more of the following methods of analysis or investment strategies when providing investment advice to you:

**Charting Analysis** - involves the gathering and processing of price and volume pattern information for a particular security, sector, broad index or commodity. This price and volume pattern information is analyzed. The resulting pattern and correlation data is used to detect departures from expected performance and diversification and predict future price movements and trends.

**Risk:** Our charting analysis may not accurately detect anomalies or predict future price movements. Current prices of securities may reflect all information known about the security and day-to-day changes in market prices of securities may follow random patterns and may not be predictable with any reliable degree of accuracy.

**Cyclical Analysis** - a type of technical analysis that involves evaluating recurring price patterns and trends. Economic/business cycles may not be predictable and may have many fluctuations between long-term expansions and contractions.

**Risk:** The lengths of economic cycles may be difficult to predict with accuracy and therefore the risk of cyclical analysis is the difficulty in predicting economic trends and consequently the changing value of securities that would be affected by these changing trends.

**Modern Portfolio Theory** - a theory of investment which attempts to maximize portfolio expected return for a given amount of portfolio risk, or equivalently minimize risk for a given level of expected return, by carefully diversifying the proportions of various assets.

**Risk:** Market risk is that part of a security's risk that is common to all securities of the same general class (stocks and bonds) and thus cannot be eliminated by diversification.

**Long-Term Purchases** - securities purchased with the expectation that the value of those securities will grow over a relatively long period of time, generally greater than one year.

**Risk:** Using a long-term purchase strategy generally assumes the financial markets will go up in the long term, which may not be the case. There is also the risk that the segment of the market that you are invested in or perhaps just your particular investment will go down over time even if the overall financial markets advance. Purchasing investments long-term may create an opportunity cost - "locking-up" assets that may be better utilized in the short-term in other investments.

**Short-Term Purchases** - securities purchased with the expectation that they will be sold within a relatively short period of time, generally less than one year, to take advantage of the securities' short-term price fluctuations.

**Risk:** Using a short-term purchase strategy generally assumes that we can predict how financial markets will perform in the short-term which may be very difficult and will incur a disproportionately higher amount of transaction costs compared to long-term trading. There are many factors that can affect financial market performance in the short term (such as short-term interest rate changes, cyclical earnings announcements, etc.) but may have a smaller impact over longer periods of times.

**Option Writing** - a securities transaction that involves selling an option. An option is a contract that gives the buyer the right, but not the obligation, to buy or sell a particular security at a specified price on or before the expiration date of the option. When an investor sells a call option, he or she must deliver to the buyer a specified number of shares if the buyer exercises the option. When an investor sells a put option, he or she must pay the strike price per share if the buyer exercises the option and will receive the specified number of shares. The option writer/seller receives a premium (the market price of the option at a particular time) in exchange for writing the option.

**Risk:** Options are complex investments and can be very risky, especially if the investor does not own the underlying stock. In certain situations, an investor's risk can be unlimited.

**Trading** - We may use frequent trading (in general, selling securities within 30 days of purchasing the same securities) as an investment strategy when managing your account(s). Frequent trading is not a fundamental part of our overall investment strategy, but we may use this strategy occasionally when we determine that it is suitable given your stated investment objectives and tolerance for risk. This may include buying and selling securities frequently to capture significant market gains and avoid significant losses.

**Risk:** When a frequent trading policy is in effect, there is a risk that investment performance within your account may be negatively affected, particularly through increased brokerage and other transactional costs and taxes.

Our investment strategies and advice may vary depending upon each client's specific financial situation. As such, we determine investments and allocations based upon your predefined objectives, risk tolerance, time horizon, financial information, liquidity needs and other various suitability factors. Your restrictions and guidelines may affect the composition of your portfolio. It is important that you notify us immediately with respect to any material changes to your financial circumstances, **including for example, a change in your current or expected income level, tax circumstances, or employment status.**

### **Tax Considerations**

Our strategies and investments may have unique and significant tax implications. However, unless we specifically agree otherwise, and in writing, tax efficiency is not our primary consideration in the management of your assets. Regardless of your account size or any

other factors, we strongly recommend that you consult with a tax professional regarding the investing of your assets.

Custodians and broker-dealers must report the cost basis of equities acquired in client accounts. Your custodian will default to the First-In First-Out ("FIFO") accounting method for calculating the cost basis of your investments. You are responsible for contacting your tax advisor to determine if this accounting method is the right choice for you. If your tax advisor believes another accounting method is more advantageous, provide written notice to our firm immediately and we will alert your account custodian of your individually selected accounting method. Decisions about cost basis accounting methods will need to be made before trades settle, as the cost basis method cannot be changed after settlement.

### **Risk of Loss**

Investing in securities involves risk of loss that you should be prepared to bear. We do not represent or guarantee that our services or methods of analysis can or will predict future results, successfully identify market tops or bottoms or insulate clients from losses due to market corrections or declines. We cannot offer any guarantees or promises that your financial goals and objectives will be met. Past performance is in no way an indication of future performance.

### **Other Risk Considerations**

When evaluating risk, financial loss may be viewed differently by each client and may depend on many different risks, each of which may affect the probability and magnitude of any potential losses. The following risks may not be all-inclusive but should be considered carefully by a prospective client before retaining our services.

**Liquidity Risk:** The risk of being unable to sell your investment at a fair price at a given time due to high volatility or lack of active liquid markets. You may receive a lower price, or it may not be possible to sell the investment at all.

**Credit Risk:** Credit risk typically applies to debt investments such as corporate, municipal, and sovereign fixed income or bonds. A bond issuing entity can experience a credit event that could impair or erase the value of an issuer's securities held by a client.

**Inflation and Interest Rate Risk:** Security prices and portfolio returns will likely vary in response to changes in inflation and interest rates. Inflation causes the value of future dollars to be worthless and may reduce the purchasing power of a client's future interest payments and principal. Inflation also generally leads to higher interest rates which may cause the value of many types of fixed income investments to decline.

**Horizon and Longevity Risk:** The risk that your investment horizon is shortened because of an unforeseen event, for example, the loss of your job. This may force you to sell investments that you were expecting to hold for the long term. If you must sell at a time that the markets are down, you may lose money. Longevity Risk is the risk of outliving your savings. This risk is particularly relevant for people who are retired or nearing retirement.

## **Recommendation of Particular Types of Securities**

We recommend various types of securities and we do not primarily recommend one type of security over another since each client has different needs and a different tolerance for risk. Each type of security has its own unique set of risks associated with it and it would not be possible to list here all the specific risks of every type of investment. Even within the same type of investment, risks can vary widely. However, in very general terms, the higher the anticipated return of an investment, the higher the risk of loss associated with the investment. A description of the types of securities we may recommend to you and some of their inherent risks are provided below.

**Certificates of Deposit:** Certificates of deposit ("CD") are generally a safe type of investment since they are insured by the Federal Deposit Insurance Company ("FDIC") up to a certain amount. However, because the returns are generally low, there is risk that inflation outpaces the return of the CD. Certain CDs are traded in the marketplace and not purchased directly from a banking institution. In addition to trading risk, when CDs are purchased at a premium, the premium is not covered by the FDIC.

**Commercial Paper:** Commercial paper ("CP") is, in most cases, an unsecured promissory note that is issued with a maturity of 270 days or less. Being unsecured the risk to the investor is that the issuer may default. There is a less risk in asset based commercial paper (ABCP). The difference between ABCP and CP is that instead of being an unsecured promissory note representing an obligation of the issuing company, ABCP is backed by securities. Therefore, the perceived quality of the ABCP depends on the underlying securities.

**Stocks:** There are numerous ways of measuring the risk of equity securities (also known simply as "equities" or "stock"). In very broad terms, the value of a stock depends on the financial health of the company issuing it. However, stock prices can be affected by many other factors including, but not limited to the class of stock (for example, preferred or common); the health of the market sector of the issuing company; and the overall health of the economy. In general, larger, better-established companies ("large cap") tend to be safer than smaller start-up companies ("small cap") are but the mere size of an issuer is not, by itself, an indicator of the safety of the investment.

**Mutual Funds and Exchange Traded Funds:** Mutual funds and exchange traded funds ("ETF") are professionally managed collective investment systems that pool money from many investors and invest in stocks, bonds, short-term money market instruments, other mutual funds, other securities, or any combination thereof. The fund will have a manager that trades the fund's investments in accordance with the fund's investment objective. While mutual funds and ETFs generally provide diversification, risks can be significantly increased if the fund is concentrated in a particular sector of the market, primarily invests in small cap or speculative companies, uses leverage (i.e., borrows money) to a significant degree, or concentrates in a particular type of security (i.e., equities) rather than balancing the fund with different types of securities. ETFs differ from mutual funds since they can be bought and sold throughout the day like stock and their price can fluctuate throughout the day. The returns on mutual funds and ETFs can be reduced by the costs of managing the funds. Also, while some mutual funds are "no load" and charge no fee to buy into, or sell out of, the fund, other types of mutual funds do charge such fees which can also reduce returns.

Mutual funds can also be "closed end" or "open end". So-called "open end" mutual funds continue to allow in new investors indefinitely whereas "closed end" funds have a fixed number of shares to sell which can limit their availability to new investors.

ETFs may have tracking error risks. For example, the ETF investment adviser may not be able to cause the ETF's performance to match that of its Underlying Index or other benchmark, which may negatively affect the ETF's performance. In addition, for leveraged and inverse ETFs that seek to track the performance of their Underlying Indices or benchmarks daily, mathematical compounding may prevent the ETF from correlating with performance of its benchmark. In addition, an ETF may not have investment exposure to all of the securities included in its Underlying Index, or its weighting of investment exposure to such securities may vary from that of the Underlying Index. Some ETFs may invest in securities or financial instruments that are not included in the Underlying Index, but which are expected to yield similar performance.

**Futures:** Futures are financial contracts obligating the buyer to purchase an asset (or the seller to sell an asset), such as a physical commodity or a financial instrument, at a predetermined future date and price. The primary difference between options and futures is that options give the holder the right to buy or sell the underlying asset at expiration, while the holder of a futures contract is obligated to fulfill the terms of his/her contract. Buyers and sellers in the futures market primarily enter into futures contracts to hedge risk or speculate rather than to exchange physical goods. Futures are for speculating. They may be used for hedging or may be a more efficient instrument to trade than the underlying asset.

**Leveraged Exchange Traded Funds:** Leveraged Exchange Traded Funds ("Leveraged ETFs" or "L-ETF") seek investment results for a single day only, not for longer periods. A "single day" is measured from the time the L-ETF calculates its net asset value ("NAV") to the time of the L-ETF's next NAV calculation. The return of the L-ETF for periods longer than a single day will be the result of each day's returns compounded over the period, which will very likely differ from multiplying the return by the stated leverage for that period. For periods longer than a single day, the L-ETF will lose money when the level of the Index is flat, and it is possible that the L-ETF will lose money even if the level of the Index rises. Longer holding periods, higher index volatility and greater leverage both exacerbate the impact of compounding on an investor's returns. During periods of higher Index volatility, the volatility of the Index may affect the L-ETF's return as much as or more than the return of the Index. Leveraged ETFs are different from most exchange-traded funds in that they seek leveraged returns relative to the applicable index and only on a daily basis. The L-ETF also is riskier than similarly benchmarked exchange-traded funds that do not use leverage. Accordingly, the L-ETF may not be suitable for all investors and should be used only by knowledgeable investors who understand the potential consequences of seeking daily leveraged investment results.

**Leveraged ETF Leveraged Risk** - The L-ETF obtains investment exposure in excess of its assets in seeking to achieve its investment objective — a form of leverage — and will lose more money in market environments adverse to its daily objective than a similar fund that does not employ such leverage. The use of such leverage could result in the total loss of an investor's investment. For example: a 2X fund will have a multiplier of two times (2x) the Index. A single day movement in the Index approaching 50% at any point in the day could result in the total loss of a shareholder's investment if that movement is contrary to the

investment objective of the L-ETF, even if the Index subsequently moves in the opposite direction, eliminating all or a portion of the earlier movement. This would be the case with any such single day movements in the Index, even if the Index always maintains a level greater than zero.

**Leveraged ETF Compounding Risk** - Compounding affects all investments but has a more significant impact on a leveraged fund. Particularly during periods of higher Index volatility, compounding will cause results for periods longer than a single day to vary from the stated multiplier of the return of the Index. This effect becomes more pronounced as volatility increases.

**Leveraged ETF Use of Derivatives** - The L-ETF obtains investment exposure through derivatives. Investing in derivatives may be considered aggressive and may expose the L-ETF to greater risks than investing directly in the reference asset(s) underlying those derivatives. These risks include counterparty risk, liquidity risk and increased correlation risk (each as discussed below). When the L-ETF uses derivatives, there may be imperfect correlation between the value of the reference asset(s) and the derivative, which may prevent the L-ETF from achieving its investment objective. Because derivatives often require only a limited initial investment, the use of derivatives also may expose the L-ETF to losses more than those amounts initially invested. The L-ETF may use a combination of swaps on the Index and swaps on an ETF that is designed to track the performance of the Index. The performance of an ETF may not track the performance of the Index due to embedded costs and other factors. Thus, to the extent the L-ETF invests in swaps that use an ETF as the reference asset, the L-ETF may be subject to greater correlation risk and may not achieve as high a degree of correlation with the Index as it would if the L-ETF only used swaps on the Index. Moreover, with respect to the use of swap agreements, if the Index has a dramatic intraday move that causes a material decline in the L-ETF's net assets, the terms of a swap agreement between the L-ETF and its counterparty may permit the counterparty to immediately close out the transaction with the L-ETF. In that event, the L-ETF may be unable to enter into another swap agreement or invest in other derivatives to achieve the desired exposure consistent with the L-ETF's investment objective. This, in turn, may prevent the L-ETF from achieving its investment objective, even if the Index reverses all or a portion of its intraday move by the end of the day. Any costs associated with using derivatives will also have the effect of lowering the L-ETF's return.

**Money Market Funds:** A money market fund is technically a security. The fund managers attempt to keep the share price constant at \$1/share. However, there is no guarantee that the share price will stay at \$1/share. If the share price goes down, you can lose some or all of your principal. The U.S. Securities and Exchange Commission ("SEC") notes that "While investor losses in money market funds have been rare, they are possible." In return for this risk, you should earn a greater return on your cash than you would expect from a Federal Deposit Insurance Corporation ("FDIC") insured savings account (money market funds are not FDIC insured). Next, money market fund rates are variable. In other words, you do not know how much you will earn on your investment next month. The rate could go up or go down. If it goes up, that may result in a positive outcome. However, if it goes down and you earn less than you expected to earn, you may end up needing more cash. A final risk you are taking with money market funds has to do with inflation. Because money market funds are safer than other investments like stocks, long-term average returns on money market

funds tend to be less than long term average returns on riskier investments. Over long periods of time, inflation can eat away at your returns.

**Municipal Securities:** Municipal securities, while generally thought of as safe, can have significant risks associated with them including, but not limited to: the credit worthiness of the governmental entity that issues the bond; the stability of the revenue stream that is used to pay the interest to the bondholders; when the bond is due to mature; and, whether or not the bond can be "called" prior to maturity. When a bond is called, it may not be possible to replace it with a bond of equal character paying the same amount of interest or yielding to maturity.

**Real Estate:** Real estate is increasingly being used as part of a long-term core strategy due to increased market efficiency and increasing concerns about the future long-term variability of stock and bond returns. In fact, real estate is known for its ability to serve as a portfolio diversifier and inflation hedge. However, the asset class still bears a considerable amount of market risk. Real estate has shown itself to be very cyclical, somewhat mirroring the ups and downs of the overall economy. In addition to employment and demographic changes, real estate is also influenced by changes in interest rates and the credit markets, which affect the demand and supply of capital and thus real estate values. Along with changes in market fundamentals, investors wishing to add real estate as part of their core investment portfolios need to look for property concentrations by area or by property type. Because property returns are directly affected by local market basics, real estate portfolios that are too heavily concentrated in one area or property type can lose their risk mitigation attributes and bear additional risk by being too influenced by local or sector market changes.

**Real Estate Investment Trust:** A real estate investment trust ("REIT") is a corporate entity which invests in real estate and/or engages in real estate financing. A REIT reduces or eliminates corporate income taxes. REITs can be publicly or privately held. Public REITs may be listed on public stock exchanges. REITs are required to declare 90% of their taxable income as dividends, but they pay dividends out of funds from operations, so cash flow has to be strong or the REIT must either dip into reserves, borrow to pay dividends, or distribute them in stock (which causes dilution). After 2012, the IRS stopped permitting stock dividends. Most REITs must refinance or erase large balloon debts periodically. The credit markets are no longer frozen, but banks are demanding, and getting, harsher terms to re-extend REIT debt. Some REITs may be forced to make secondary stock offerings to repay debt, which will lead to additional dilution of the stockholders. Fluctuations in the real estate market can affect the REIT's value and dividends.

**Variable Annuities:** A variable annuity is a form of insurance where the seller or issuer (typically an insurance company) makes a series of future payments to a buyer (annuitant) in exchange for the immediate payment of a lump sum (single-payment annuity) or a series of regular payments (regular-payment annuity). The payment stream from the issuer to the annuitant has an unknown duration based principally upon the date of death of the annuitant. At this point, the contract will terminate, and the remainder of the funds accumulated will be forfeited unless there are other annuitants or beneficiaries in the contract. Annuities can be purchased to provide an income during retirement.

Unlike fixed annuities that make payments in fixed amounts or in amounts that increase by a fixed percentage, variable annuities pay amounts that vary according to the performance of a specified set of investments, typically bond and equity mutual funds. Many variable annuities typically impose asset-based sales charges or surrender charges for withdrawals within a specified period. Variable annuities may impose a variety of fees and expenses, in addition to sales and surrender charges, such as mortality and expense risk charges; administrative fees; underlying fund expenses; and charges for special features, all of which can reduce the return. Earnings in a variable annuity do not provide all the tax advantages of 401(k)s and other before-tax retirement plans. Once the investor starts withdrawing money from their variable annuity, earnings are taxed at the ordinary income rate, rather than at the lower capital gains rates applied to other non-tax- deferred vehicles which are held for more than one year. Proceeds of most variable annuities do not receive a "step-up" in cost basis when the owner dies like stocks, bonds and mutual funds do. Some variable annuities offer "bonus credits." These are usually not free. In order to fund them, insurance companies typically impose mortality and expense charges and surrender charge periods. In an exchange of an existing annuity for a new annuity (so-called 1035 exchanges), the new variable annuity may have a lower contract value and a smaller death benefit; may impose new surrender charges or increase the period of time for which the surrender charge applies; may have higher annual fees; and provide another commission for the broker.

## **Item 9 Disciplinary Information**

We are required to disclose the facts of any legal or disciplinary events that are material to a client's evaluation of our advisory business or the integrity of our management. We do not have any required disclosures under this item.

## **Item 10 Other Financial Industry Activities and Affiliations**

### **Licensed Insurance Agent**

Delford P. McCallister II is licensed as an independent insurance agent and may earn commission-based compensation for selling insurance products to you. See the Fees and Compensation section in this brochure for more information on the compensation received by insurance agents who are affiliated with our firm.

## **Item 11 Code of Ethics, Participation or Interest in Client Transactions and Personal Trading**

### **Description of Our Code of Ethics**

We strive to comply with applicable laws and regulations governing our practices. Therefore, our Code of Ethics includes guidelines for professional standards of conduct for persons associated with our firm. Our goal is to always protect your interests and to demonstrate our commitment to our fiduciary duties of honesty, good faith, and fair dealing with you. All persons associated with our firm are expected to adhere strictly to these guidelines.

Persons associated with our firm are also required to report any violations of our Code of Ethics. Additionally, we maintain and enforce written policies reasonably designed to prevent the misuse or dissemination of material, non-public information about you or your account holdings by persons associated with our firm. Clients or prospective clients may obtain a copy of our Code of Ethics by contacting us at the telephone number on the cover page of this brochure.

### **Participation or Interest in Client Transactions**

Neither our firm nor any persons associated with our firm has any material financial interest in client transactions beyond the provision of investment advisory services as disclosed in this brochure.

### **Personal Trading Practices**

Our firm or persons associated with our firm may buy or sell the same securities that we recommend to you or securities in which you are already invested. A conflict of interest exists in such cases because we have the ability to trade ahead of you and potentially receive more favorable prices than you will receive. To mitigate this conflict of interest, it is our policy that neither our firm nor persons associated with our firm shall have priority over your account in the purchase or sale of securities.

### **Aggregated Trading**

Our firm or persons associated with our firm may buy or sell securities for you at the same time we or persons associated with our firm buy or sell such securities for our own account. We may also combine our orders to purchase securities with your orders to purchase securities ("aggregated trading"). Refer to the Brokerage Practices section in this brochure for information on our aggregated trading practices.

A conflict of interest exists in such cases because we have the ability to trade ahead of you and potentially receive more favorable prices than you will receive. To eliminate this conflict of interest, it is our policy that neither our firm nor persons associated with our firm shall have priority over your account in the purchase or sale of securities.

## **Item 12 Brokerage Practices**

We recommend the brokerage and custodial services of Charles Schwab & Co., Inc. ("Schwab"), an unaffiliated SEC-registered broker-dealer and FINRA member. Your assets must be maintained in an account at a "qualified custodian," generally a broker-dealer or bank. In recognition of the value of the services the Custodian provides, you may pay higher commissions and/or trading costs than those that may be available elsewhere. We seek to recommend a custodian/broker that will hold your assets and execute transactions on terms that are, overall, the most favorable compared to other available providers and their services. We consider various factors, including:

- Capability to buy and sell securities for your account itself or to facilitate such services.
- The likelihood that your trades will be executed.
- Availability of investment research and tools.
- Overall quality of services.
- Competitiveness of price.
- Reputation, financial strength, and stability.
- Existing relationship with our firm and our other clients.

### **Research and Other Soft Dollar Benefits**

We do not have any soft dollar arrangements.

### **Economic Benefits**

As a registered investment adviser, we have access to the institutional platform of your account custodian. As such, we will also have access to research products and services from your account custodian and/or another brokerage firm. These products may include financial publications, information about companies and industries, research software, and other products or services that provide lawful and appropriate assistance to our firm in the performance of our investment decision making responsibilities. Such research products and services are provided to all investment advisers that utilize the institutional services platforms of these firms and are not considered to be paid for in soft dollars. However, you should be aware that the commissions charged by a particular broker for a particular transaction or set of transactions may be greater than the amounts another broker who did not provide research services or products might charge.

### **Schwab - Your Custody and Brokerage Costs**

For our clients' accounts it maintains, Schwab generally does not charge you separately for custody services but is compensated by charging you commissions or other fees on trades that it executes or that settle into your Schwab account. Schwab's commission rates and/or asset-based fees applicable to our client accounts were negotiated based on our commitment to maintain \$ of our clients' assets statement equity in accounts at Schwab. This commitment benefits you because the overall commission rates and/or asset-based fees you pay are lower than they would be if we had not made the commitment. In addition to commission rates and/or asset-based fees Schwab charges you a flat dollar amount as a "prime broker" or "trade away" fee for each trade that we have executed by a different broker-dealer but where the securities bought or the funds from the securities sold are deposited (settled) into your Schwab account. These fees are in addition to the commissions or other compensation you pay the executing broker-dealer. Because of this, in order to minimize your trading costs, we have Schwab execute most trades for your account.

### **Schwab Adviser Services**

Schwab Advisor Services (formerly called Schwab Institutional) is Schwab's business serving independent investment advisory firms like ours. They provide us and our clients with access to its institutional brokerage - trading, custody, reporting and related services - many of which are not typically available to Schwab retail customers. Schwab also makes

available various support services. Some of those services help us manage or administer our clients' accounts while others help us manage and grow our business. Schwab's support services are generally available on an unsolicited basis (we don't have to request them) and at no charge to us.

### **Services that Benefit You**

Schwab's institutional brokerage services include access to a broad range of investment products, execution of securities transactions, and custody of client assets. The investment products available through Schwab include some to which we might not otherwise have access or that would require a significantly higher minimum initial investment by our clients. Schwab's services described in this paragraph generally benefit you and your account.

### **Services that May Not Directly Benefit You**

Schwab also makes available to us other products and services that benefit us but may not directly benefit you or your account. These products and services assist us in managing and administering our clients' accounts. They include investment research, both Schwab's own and that of third parties. We may use this research to service all or some substantial number of our clients' accounts, including accounts not maintained at Schwab. In addition to investment research, Schwab also makes available software and other technology that:

- provide access to client account data (such as duplicate trade confirmations and account statements).
- facilitate trade execution and allocate aggregated trade orders for multiple client accounts.
- provide pricing and other market data; facilitates payment of our fees from our clients' accounts.
- assist with back-office functions, recordkeeping, and client reporting.

### **Services that Generally Benefit Only Us**

Schwab also offers other services intended to help us manage and further develop our business enterprise. These services include:

- educational conferences and events.
- technology, compliance, legal, and business consulting.
- publications and conferences on practice management and business succession.
- access to employee benefits providers, human capital consultants and insurance providers; and
- discount of up to \$4,250 on PortfolioCenter® Reporting Software.

Schwab may provide some of these services itself. In other cases, it will arrange for third-party vendors to provide the services to us. Schwab may also discount or waive its fees for some of these services or pay all or a part of a third party's fees. Schwab may also provide us with other benefits such as occasional business entertainment of our personnel.

## **Our Interest in Schwab's Services**

The availability of these services from Schwab benefits us because we do not have to produce or purchase them. These services may give us an incentive to recommend that you maintain your account with Schwab based on our interest in receiving Schwab's services that benefit our business rather than based on your interest in receiving the best value in custody services and the most favorable execution of your transactions. This is a potential conflict of interest. We believe, however, that our selection of Schwab as custodian and broker is in the best interests of our clients. It is primarily supported by the scope, quality and price of Schwab's services (based on the factors discussed above - see "The Custodian and Broker We Use") and not Schwab's services that benefit only us. We do not believe that maintaining our client's assets at Schwab for services presents a material conflict of interest.

## **Brokerage for Client Referrals**

We do not receive client referrals from broker-dealers in exchange for cash or other compensation, such as brokerage services or research.

## **Directed Brokerage**

In limited circumstances, and at our discretion, some clients may instruct our firm to use one or more brokers for the transactions in their accounts. If you choose to direct our firm to use a broker, you should understand that this might prevent our firm from aggregating trades with other client accounts or from effectively negotiating brokerage commissions on your behalf. This practice may also prevent our firm from obtaining favorable net price and execution. Thus, when directing brokerage business, you should consider whether the commission expenses, execution, clearance, and settlement capabilities that you will obtain through your broker are adequately favorable in comparison to those that we would otherwise obtain for you.

## **Aggregated Trades**

We combine multiple orders for shares of the same securities purchased for discretionary advisory accounts we manage (this practice is commonly referred to as "aggregated trading"). We will then distribute a portion of the shares to participating accounts in a fair and equitable manner. Generally, participating accounts will pay a fixed transaction cost regardless of the number of shares transacted. In certain cases, each participating account pays an average price per share for all transactions and pays a proportionate share of all transaction costs on any given day. In the event an order is only partially filled, the shares will be allocated to participating accounts in a fair and equitable manner, typically in proportion to the size of each client's order. Accounts owned by our firm or persons associated with our firm may participate in aggregated trading with your accounts; however, they will not be given preferential treatment. We do not aggregate trades for non-discretionary accounts. Accordingly, non-discretionary accounts may pay different costs than discretionary accounts pay. If you enter into non-discretionary arrangements with our firm, we may not be able to buy and sell the same quantities of securities for you and you may pay higher commissions, fees, and/or transaction costs than clients who enter into discretionary arrangements with our firm.

## Item 13 Review of Accounts

Delford Paul McCallister II, Manager/Chief Compliance Officer will monitor your accounts on an ongoing basis and will conduct account reviews at least quarterly, to ensure the advisory services provided to you are consistent with your investment needs and objectives.

Additional reviews may be conducted based on various circumstances, including, but not limited to:

- contributions and withdrawals.
- year-end tax planning.
- market moving events.
- security specific events; and/or
- changes in your risk/return objectives.

The individuals conducting reviews may vary from time to time, as personnel join or leave our firm.

We will not provide you with regularly written reports. You will receive trade confirmations and monthly or quarterly statements from your account custodian(s).

Delford Paul McCallister II, Manager/Chief Compliance Officer will review financial plans as needed, depending on the arrangements made with you at the inception of your advisory relationship to ensure that the advice provided is consistent with your investment needs and objectives. Generally, we will contact you periodically to determine whether any updates may be needed based on changes in your circumstances. Changed circumstances may include, but are not limited to marriage, divorce, birth, death, inheritance, lawsuit, retirement, job loss and/or disability, among others. We recommend meeting with you at least annually to review and update your plan if needed. Additional reviews will be conducted upon your request. Such reviews and updates may be subject to our current hourly rate. We will not provide regular written reports for financial planning and consulting services. If you implement financial planning advice, you will receive trade confirmations and monthly or quarterly statements from relevant custodians.

## Item 14 Client Referrals and Other Compensation

### Charles Schwab & Co., Inc - Institutional

In addition, we receive an economic benefit from Schwab in the form of the support products and services it makes available to us and other independent investment advisors whose clients maintain their accounts at Schwab. These products and services, how they benefit us, and the related conflicts of interest are described above (see *Item 12 - Brokerage Practices*). The availability to us of Schwab's products and services is not based on us giving particular investment advice, such as buying securities for our clients.

As disclosed under the *Fees and Compensation* section in this brochure, persons providing investment advice on behalf of our firm are licensed insurance agents. For information on the conflicts of interest this presents, and how we address these conflicts, refer to the *Fees and Compensation* section.

We do not receive any compensation from any third party in connection with providing investment advice to you nor do we compensate any individual or firm for client referrals.

Refer to the *Brokerage Practices* section above for disclosures on research and other benefits we may receive resulting from our relationship with your account custodian.

## Item 15 Custody

As paying agent for our firm, your independent custodian will directly debit your account(s) for the payment of our advisory fees. This ability to deduct our advisory fees from your accounts causes our firm to exercise limited custody over your funds or securities. We do not have physical custody of any of your funds and/or securities. Your funds and securities will be held with a bank, broker-dealer, or other qualified custodian. You will receive account statements from the qualified custodian(s) holding your funds and securities at least quarterly. The account statements from your custodian(s) will indicate the amount of our advisory fees deducted from your account(s) each billing period. You should carefully review account statements for accuracy.

## Item 16 Investment Discretion

Before we can buy or sell securities on your behalf, you must first sign our discretionary management agreement and the appropriate trading authorization forms.

You may grant our firm discretion over the selection and total amount of securities to be purchased or sold for your account(s) without obtaining your consent or approval prior to each transaction. You may specify investment objectives, guidelines, and/or impose certain conditions or investment parameters for your account(s).

For example, you may specify that the investment in any particular stock or industry should not exceed specified percentages of the value of the portfolio and/or restrictions or prohibitions of transactions in the securities of a specific industry or security. Refer to the Advisory Business section in this brochure for more information on our discretionary management services.

If you enter into a non-discretionary arrangement with our firm, we will obtain your approval prior to the execution of any transactions for your account(s). You have an unrestricted right to decline to implement any advice provided by our firm on a non-discretionary basis.

## **Item 17 Voting Client Securities**

We will not vote for proxies on behalf of your advisory accounts. At your request, we may offer you advice regarding corporate actions and the exercise of your proxy voting rights. If you own shares of applicable securities, you are responsible for exercising your right to vote as a shareholder.

In most cases, you will receive proxy materials directly from the account custodian. However, in the event we were to receive any written or electronic proxy materials, we would forward them directly to you by mail, unless you have authorized our firm to contact you by electronic mail, in which case, we would forward any electronic solicitations to vote proxies.

## **Item 18 Financial Information**

Our firm does not have any financial condition or impairment that would prevent us from meeting our contractual commitments to you. We do not take physical custody of client funds or securities, or serve as trustee or signatory for client accounts, and we do not require the prepayment of more than \$500 in fees six or more months in advance. Therefore, we are not required to include a financial statement with this brochure.

We have not filed a bankruptcy petition at any time in the past ten years.

## **Item 19 Requirements for State-Registered Advisers**

Refer to Part(s) 2B for background information about our principal executive officers, management personnel and those giving advice on behalf of our firm.

Our firm is not actively engaged in any business other than giving investment advice that is not already disclosed above.

Neither our firm, nor any persons associated with our firm are compensated for advisory services with performance-based fees. Refer to the Performance-Based Fees and Side-By-Side Management section above for additional information on this topic.

Neither our firm, nor any of our management persons have any reportable arbitration claims, civil, self-regulatory organization proceedings, or administrative proceedings.

Neither our firm nor any of our management persons have a material relationship or arrangement with any issuer of securities.

## **Item 20 Additional Information**

### **Trade Errors**

In the event a trading error occurs in your account, our policy is to restore your account to the position it should have been in had the trading error not occurred. Depending on the circumstances, corrective actions may include canceling the trade, adjusting an allocation, and/or reimbursing the account.

### **Class Action Lawsuits**

We will assist you, in conjunction with your legal counsel or other professionals, in filing claims with the claims administrator to participate in any settlement proceeds related to class action settlements involving a security held in your portfolio. We may also work with your legal counsel to determine whether you are eligible to participate in class action litigation to recover damages on your behalf for injuries as a result of actions, misconduct, or negligence by issuers of securities held in your portfolio.

**FORM ADV PART 2B BROCHURE SUPPLEMENT**

This brochure supplement provides information about Delford P. McCallister II that supplements the 3CM Capital Management, LLC brochure. You should have received a copy of that brochure. Contact us at 330-818-9834 if you did not receive 3CM Capital Management, LLC's brochure or if you have any questions about the contents of this supplement.

Additional information about Delford P. McCallister II (CRD # 6504730) is available on the SEC's website at [www.adviserinfo.sec.gov](http://www.adviserinfo.sec.gov).

## Item 2 Educational Background and Business Experience

### Delford P. McCallister II, CRPC

*Year of Birth:* 1982

*Formal Education After High School:*

- University of Akron, BS Business Administration, 2014

*Business Background:*

- 3CM Capital Management, LLC, Investment Adviser Representative, 3/2020 - Present
- 3CM Capital Management, LLC, Manager/Chief Compliance Officer, 7/2019 - Present
- Bank of America Merrill Lynch, Assistant Vice President, Senior Portfolio Advisor, 11/2018 - 3/2020
- Edward Jones, Financial Advisor, 6/2015 - 11/2018
- United States Postal Service, City Carrier/ 204-B Supervisor, 9/2006 - 6/2015
- United States Army, 3-Bravo, 4/2002 - 6/2006

*Certifications:* **CRPC**

### Chartered Retirement Planning Counselor (CRPC)

Chartered Retirement Planning Counselor (CRPC) is a professional financial planning designation awarded by the College for Financial Planning. Individuals may earn the CRPC designation by completing a study program and passing a final multiple-choice examination. Successful applicants earn the right to use the CRPC designation with their names for two years. Every two years, CRPC professionals must complete 16 hours of continuing education and pay a small fee to continue using the designation.

## Item 3 Disciplinary Information

Form ADV Part 2B requires disclosure of certain criminal or civil actions, administrative proceedings, and self-regulatory organization proceedings, as well as certain other proceedings related to suspension or revocation of a professional attainment, designation, or license. Mr. Delford P. McCallister II has no required disclosures under this item.

## **Item 4 Other Business Activities**

Delford P. McCallister II is separately licensed as an independent insurance agent. In this capacity, he can affect transactions in insurance products for his clients and earn commissions for these activities. The fees you pay our firm for advisory services are separate and distinct from the commissions earned by Mr. McCallister II for insurance-related activities. This presents a conflict of interest because Mr. McCallister II may have an incentive to recommend insurance products to you for the purpose of generating commissions rather than solely based on your needs. However, you are under no obligation, contractual or otherwise, to purchase insurance products through any person affiliated with our firm.

## **Item 5 Additional Compensation**

Refer to the Other Business Activities section above for disclosures on Mr. McCallister II's receipt of additional compensation as a result of his other business activities.

Also, refer to the Fees and Compensation, Client Referrals and Other Compensation, and Other Financial Industry Activities and Affiliations section(s) of 3CM Capital Management, LLC's firm brochure for additional disclosures on this topic.

## **Item 6 Supervision**

As the Manager/Chief Compliance Officer of 3CM Capital Management, LLC, Delford P. McCallister II supervises the advisory activities of our firm. Delford P. McCallister II can be reached at 330-8189834.

## **Item 7 Requirements for State Registered Advisers**

Delford P. McCallister II does not have any reportable arbitration claims, has not been found liable in a reportable civil, self-regulatory organization or administrative proceeding, and has not been the subject of a bankruptcy petition.
